ABOUT ME

Mid/senior software engineer with experience in AI-centric software and not only. During the years I've acquired experience in autonomously handling projects from research to deployment. My main objective is to keep grinding my skills in the direction of building software that brings value to customers in an agile and reliable way. For this reason I am looking for enthusiast and technically-energetic backend engineering teams that have same values at heart to start a new journey.

EXPERIENCE

05/2020 – present

Software Engineer
Bluetensor, Trento, IT

Self Employed | Freelance

Managed, designed, developed and maintained AI-centred projects and not only. Specifically I supported Bluetensor microservices environment with project management and software engineering activities such:

- Adapted interaction with clients based on Agile methodology that led to an easier and cleaner of the project planning and delivery processes
- Design, development and delivery of new features on an Agile-based Methodology that improved overall delivery process speed
- Evolved Monitoring techniques that led to a better maintenance of production software
- Design, development and maintenance of new parts of the Cloud Infrastructure and of the Continuous Integration Pipeline that led to a faster release process
- Design and development Data Communication channels through Web APIs or Event Buses
- Design and development of MLOps such as models tracking, integration, and delivery that led to a faster ML models development and integration

Technologies
used:

PYTHON

DJANGO

DOCKER COMPOSE

AWS CLOUD

RABBITMQ

ANSIBLE

MLFLOW

BITBUCKET

09/2020 – 04/2022

Software Engineer
Fraudio, Amsterdam, NL

Self Employed | Freelance

Supported Fraudio Fraud Detection System with engineering activities such as design and development of:

- ML model artifacts, which enabled a standardized way of ML model shipment
- Configuration-based ML model selection, enabling Fraudio to deploy multiple ML Models on the same machine and select them based on custom properties
- ML models deployment and alignment tests based on data scientists' expectations to ensure correctness in production
- Procedures to deploy a huge quantity of data into in-memory databases to support production ML models with additional pre-computed features enabling more complex models to be supported
- New features for ML models serving applications such as authentication and authorization mechanisms easing customer on-boarding
- Web APIs to collect and process data enabling ML models to be efficiently trained
- API Gateway and Integration Documentation, making customer integration easier
- DevOps automation through CI/CD
- Incidents management and application debugging

Technologies
used:

SCALA

PYTHON

PLAY FRAMEWORK

SPARK

DATABRICKS

KUBERNETES

AIRFLOW

GOOGLE CLOUD

GITLAB

03/2020 – 09/2020

R&D Software Engineer
Fraudio, Amsterdam, NL

Internship

- Researched innovative distributed serverless caching systems solutions applied to small objects management (company's use case) that could reduce hosting costs from 31x to 96x
- Developed my master's dissertation on such a thesis
- Migrated Infinicache (a first of its kind distributed serverless caching system) from AWS Lambda to KNative

Technologies
used:

GO

KNATIVE

KUBERNETES

AWS LAMBDA

GIT

04/2018 – 09/2018

Full-stack Developer

Edutech, Trento, IT 🇮🇹

Full-time

- Replaced Shareable Content Object Reference Model (SCORM) of Edutech Learning Management System (LMS) with Experience API (xAPI). This project helped the company to upgrade its LMS allowing them to be more competitive in the market
- Designed and developed various utility software services necessary for internal and external procedures, managing most of the work independently but also coordinating with the team

Technologies used:

ASP.NET

ANGULAR

JAVASCRIPT

JQUERY

AJAX

06/2017 – 04/2018

Full-stack Developer | Research Assistant

Fondazione Bruno Kessler, Trento, IT 🇮🇹

Internship

- Designed, developed, and tested CoachAI, a platform composed of a conversational assistant who helps people promote a healthy lifestyle and a related management platform that allows doctors to monitor their patients' progress based on data collected through the chatbot
- Developed my bachelor thesis 🇮🇹 on such a project
- Participated in user-centered testing sessions and developed other conversational agents to support those activities allowing research project improvements

Technologies used:

RUBY ON RAILS

JAVASCRIPT

JQUERY

AJAX

TELEGRAM BOT API

EDUCATION

**M.Sc. in Computer Science
Software and Service Architectures**
University of Trento 🇮🇹

**B.Sc. in Computer Science
Computer Science and Technology**
University of Trento 🇮🇹

SOFT SKILLS

🏠 **Organisational**
Autonomous, adaptable, outside the box thinker.

🗣️ **Communication**
Effective communicator and team worker.

🌱 **Aptitude**
Positive, precise.
